VF

VF VLEX DRY COOLERS

VF Industrial Dry Cooler Series

The VF-Series has been developed specifically for projects where the ambient and site conditions are harsh. A wide array of materials and motor choices allow for flexible design options to meet specific requirements.

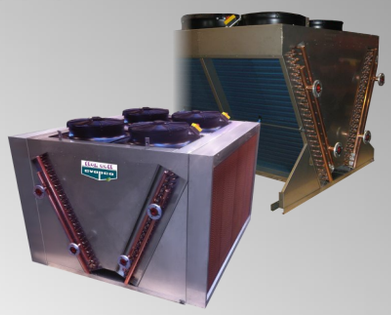
The VF industrial series can be constructed with dual heat exchangers up to 12 meters long and a 2.4 meter width. There is also an option for a 2.2 meter wide version for containerized shipment. Four coil sandwich cooler arrangements are easily selected with coil calc selection software, for HT/LT process cooling applications.

Fans and motors are individually selected and sized for optimal efficiency.

Features & benefits

VF - Series Coolers and Condensers

Designed for conditions with the most stringent requirements, EVAP-CO Air Solutions the industrial grade VF-Series Dry Cooler / Air Cooled Condenser, with options to fit a wide range of applications.

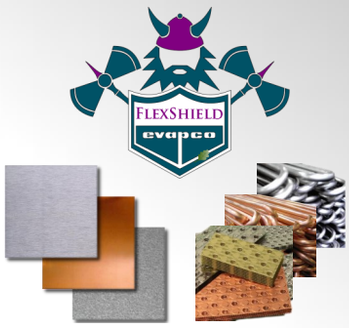


Advantages

- Smaller foot print compared to commercial units
- Less fans & motors resulting in less maintenance
- Ships fully assembled with all lifting provisions
- Fully factory wired options available

Flexibility

- Spray and Pad adiabatic options
- Multiple fan choices for sound sensitivity
- Multiple motor options including ATEX
- Flexible layout options including elevated stand
- Wide choice of materials
- HT/LT Sandwich cooler arrangements



ISO 9001 complaint

- High reliability / High quality
- PED Compliant
- Certified documentations

CoilCalc Selection Program

EVAPCO Air Solutions CoilCalc Selection program is where your custom selection begins. CoilCalc allows the designer to input the system values and then customize the unit for specific conditions. Material selections, Fin Configuration, Fin spacing, Numbers of Fans and many other unit characteristics can be pre-defined when making a selections
